DETAILED ACTION

Response to Election/Arguments

The reply filed on 2/17/2006 is not fully responsive to the prior Office Action because:

The applicant was required in the prior office action to provide an election of inventions and species and a list of claims readable thereon. Applicant makes an election of species, but does not provide a clear list as to which claims applicant believes read on the elected species and which claims are withdrawn from consideration because they do not read on the species. Applicant states that claims 36-42 are drawn to possible elections under item #3 of the prior restriction requirement, but does not state whether these claims are readable on the elected species. These claims are not marked as withdrawn nor are they included in a specific statement by the applicant of a total list of claims that read upon the applicant's election. The statement that these claims are drawn to different possible elections is not fully responsive to the restriction requirement. Applicant states that applicant believes claim 1 to be an allowable generic claim, but does not specifically state whether or not this claim is included in the elected species nor does applicant mark this claim as withdrawn to remove it from the elected species. Further, no examination of the claims has been made, so there should be no argument as to whether or not the applicant is persuaded that the claim is not allowable.

Applicant also argues on Page 3 of the arguments that claim 21 is generic to at least all species in items 4-6 and 8. This is not a complete response since claim 21 and

the argument that it reads on all species does not give a clear election of the species presented to the applicant in the restriction requirement and the claims readable thereon. On Page 3, applicant argues that the examples are "different embodiments, not different species." MPEP 806.04(e) states that species are always specifically different embodiments, and therefore this argument is not persuasive. Since this argument is not persuasive, applicant's argument that claim 21 is a generic claim readable on multiple species listed in the restriction requirement is not a complete response since it does not specify which claims are readable on the elected species.

Since the period for reply set forth in the prior Office action has expired, this application will become abandoned unless applicant corrects the deficiency and obtains an extension of time under 37 CFR 1.136(a).

The date on which the petition under 37 CFR 1.136(a) and the appropriate extension fee have been filed is the date for purposes of determining the period of extension and the corresponding amount of the fee. In no case may an applicant reply outside the SIX (6) MONTH statutory period or obtain an extension for more than FIVE (5) MONTHS beyond the date for reply set forth in an Office action. A fully responsive reply must be timely filed to avoid abandonment of this application.
